NEWS

IKEA GreenTech offer personal meetings to prize table in Green Innovation Contest

"IKEA GreenTech believes it’s important to maintain a fruitful and active relationship to entrepreneurs in Sweden working with innovations that contribute to reductions of the environmental footprint in many different ways. Our prize allow us to establish an alternative direct channel to those entrepreneurs and their network, and through this support and encourage them in the commercialization process of products and services that might contribute to a better everyday life for the many people.”

Christian Ehrenborg, IKEA GreenTech.

About Green Innovation Contest
Green Innovation Contest is a national contest meaning only contributions from Sweden have the opportunity to participate and compete. This includes companies, individuals or academy based in Sweden. Green Innovation Contest is funded by Region Västra Götaland, the Swedish Energy Agency and the Swedish Agency for Economic and Regional Growth. The contest is led by Innovatum.
